Ultra-X has a Solution for you!

The One Choice for Professional Diagnostic Test Tools.

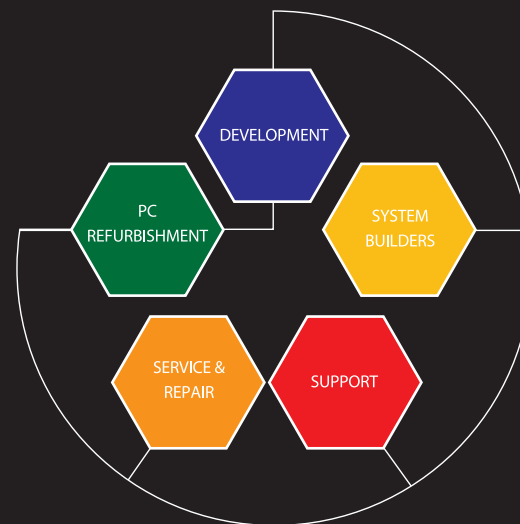

Ultra-X, Inc., hardware and software diagnostic developer and technology pioneer, offers a wide array of Professional Diagnostic Test solutions for Developers, Manufacturers, OEM/ODMs, System Engineers, Service Technicians, Integrators and Computer Professionals.

Founded in 1987 and headquartered in the heart of Silicon Valley, Ultra-X is a key contributor to the PC & Android market as technology evolves. A worldwide local presence in 13 countries across the Americas, APAC and EMEA allows us to provide local service and support.

You can never underestimate the importance of experience. One of the reasons that Ultra-X hardware and software diagnostic products are superior in the industry is that Ultra-X has been developing cutting edge diagnostic technology longer than anyone else. From the very beginning, Ultra-X has been at the forefront of diagnostic technology with a long list of "firsts" which has defined today's diagnostic market. By embracing the latest technology, we have continued to develop quick, precise, accurate and high quality diagnostics that can best meet your needs.

Innovative, Customer-Driven Solutions.

Innovative and comprehensive, Ultra-X solutions deliver a competitive advantage to PC lifecycle leaders around the world. Ultra-X offers out-of-box and custom engineered, fully tailored solutions that cater to the distinct needs of your business specific requirements. Please contact our OEM Sales Team for additional details.

Your Success is Our Business!

Our business depends on your success. Our driving force is our commitment to your rapid time to value, low total cost of ownership, and realization of true, measurable business benefits. We deliver that through commitment to best practices, a positive engagement experience and an ongoing partnership after implementation. Our customers tell us our support is the best they've ever experienced. We pledge to provide you with the best PC diagnostic tools, and look forward to seeing your name on our extensive list of satisfied customers.

QuickCAST Mobile Saves Time & Saves Your Company Money!

Traditional service repair shops typically download "free" software and try to make it work, purchase a software solution that was designed for the end user, or resort to swapping parts. With QuickCAST Mobile Diagnostic Deployment Appliance, those days are now over. It takes proven Ultra-X diagnostic technology to provide a focused solution to deliver exactly what service repair shops need to get the job done right, **the first time**.

The award-winning QuickCAST Mobile network deployment appliance does all the "dirty work". This means the days of manual repetitive involvement and time consuming tasks are over.

Diagnostic deployment is complete within a matter of seconds allowing multiple systems to easily be tested in parallel by selecting from pre-configured automated test scripts. With QuickCAST Mobile in your company's hands, servicing any PC Desktop, Laptop or Server becomes effortless, saving professional service technicians time and their organizations money.

Three Simple Steps!

Insert the network cable into each UUT and boot directly to Network. No software installation or complex configuration required!

Select from pre-configured automated test scripts and walk-away. It really is that simple!

Return in 10-25 minutes to view, print or email the test report!

Peace of Mind.

All product updates and live phone, web chat, and email support are included for the entire service term!

“

We used to go to each test bench, manually running diagnostic scripts. What used to take hours & several technicians now requires just a few clicks of the mouse. Now that's what I call saving time and money!

A Smarter Way to Service More PC's and Get the Job Done Right - The First Time!

The QuickCAST Server Network Deployment Appliance fulfills all of the system management needs of an organization from initial Diagnostic Assessment and Malware Scanning to Backup Imaging and Windows OS Installations.

SUPPORTS THE LATEST TECHNOLOGY:

QuickCAST Premium makes enterprise-scale image deployment functionality a reality to organizations of all sizes by providing a low cost alternative. Unlike traditional enterprise designed solutions which can be too costly and too complex, QuickCAST Premium does not require hardware or software pre-requisites. Best yet, QuickCAST Premium was designed to permit non-technical users to test systems in minutes with no formal training or technical skills. QuickCAST Premium is affordably priced with powerful features and impressive support resources. With QuickCAST Premium, you'll test more, test faster and lower costs at the same time!

Many Needs. One Solution.

Self-Boot and Windows Pre-Boot
Diagnostics & Stress Testing
Supports PC & Apple Mac!

Self-Boot malware scanning &
disinfection.

Backup & Restore imaging
modules.

Windows OS Installation
Supports Microsoft WDS & MDT

Securely erase storage drives
using DOD Standard

QuickTech Performance 25% Faster

Closest Competitor Performance

Baseline

QuickTech family solutions are simple to implement and increases technician efficiency by 25% over the closest competitor.

“ I love the simplicity of use. QuickCAST is an dream solution to a what used to be a tedious and labor intensive problem! ”

Find Problems Faster. Deliver Solutions Quicker.

It's here. The ultimate test solution for Android devices. Need to diagnose multiple devices concurrently? No problem. Do so without the help of a second technician, and you can do it from anywhere in the shop with wireless portability. When you want to consult a customer in the waiting room and show the customer the problem, QuickCAST for Android's wireless communication has the range to stay connected. This not only makes you more flexible; It makes you more profitable!

Quick. Simple. Accurate.

Use the smart Dashboard feature to view an overview of the device's capabilities and usage.

Tap the Information button to access detailed hardware information including vendor, model, serial, sensors, network, battery and more!

Select an automated test script or from several individual hardware diagnostic tests.

Permanently erase and factory restore Android devices with ease.

Detailed reporting is readily available following the diagnostic on both the device and on the QuickCAST management server.

Simplicitic installation and configuration removes tedious steps and maximizes technician efficiency.

Wireless Freedom. One to Many.

Test like never before. No license dongles. No ADB installation. No developer USB Debug mode. Scan once to connect to the wireless network, scan twice to provision the test software. It's that easy!

A single QuickCAST Android hardware box will provide test capabilities for up to 10 concurrent Android devices including Tablets, mobile phones, smart TV's, wearable devices and more!

“ QuickCAST has dramatically reduced my workload. Instead of being reactive, I am now proactive in the work that I do. ”

It's a Tough Act to Follow. But Follow They Do.

QuickTech Series products bring core-level system verification, peripheral testing, unattended Burn-In /Aging and system inventory capabilities for quick diagnosis of core system hardware.

“ QuickTech PRO enhances Corvalent's QA process to ensure consistent high quality and reliability standards our customers expect ”

CORVALENT

QuickTech Series products assure quality and reliability of newly built, serviced or upgraded PCs, components and subassemblies. From incoming assessment to final QA testing, QuickTech streamlines your Burn-In process with a complete and comprehensive line of software diagnostic tools designed specifically for the rigorous demands of Development, Manufacturing, Service & Repair and Asset Recovery, PC Refurbishment and Recycling.

Our Family of Over-achievers.

QuickTech Premium

PRODUCT HIGHLIGHTS:

- ☑ O/S-FREE MULTI-COMPONENT STRESS TEST
- ☑ MULTI-THREADED MEMORY TESTING
- ☑ CUSTOMIZABLE AND FLEXIBLE BURN-IN/DIAGNOSTIC
- ☑ AVAILABLE ON NETWORK IMAGE AND BOOTABLE USB

QuickTech Professional

PRODUCT HIGHLIGHTS:

- ☑ SELF-BOOT O/S-FREE BURN-IN/DIAGNOSTIC
- ☑ CUSTOMIZABLE AND FLEXIBLE BURN-IN/DIAGNOSTIC
- ☑ COMPLETE SYSTEM CORE AND PERIPHERAL TESTING
- ☑ AVAILABLE ON NETWORK IMAGE AND BOOTABLE USB

QuickTech 3R UEFI

PRODUCT HIGHLIGHTS:

- ☑ QUICK AND SIMPLE AUTOMATED OPERATION
- ☑ SELF-BOOT O/S-FREE DIAGNOSTIC
- ☑ COMPLETE ASSESSMENT IN AS LITTLE AS FIVE MINUTES
- ☑ AVAILABLE ON CDROM, NETWORK IMAGE, USB & HD EMBEDDED

QuickTech Hard Drive Clean

PRODUCT HIGHLIGHTS:

- ☑ SELF-BOOTING - OPERATING SYSTEM INDEPENDENT
- ☑ PERMANENTLY ERASES ALL DATA ON THE ENTIRE DRIVE
- ☑ DOD 5520.22-M GOVERNMENT SECURITY REQUIREMENTS
- ☑ AVAILABLE ON NETWORK IMAGE & USB

QuickTech for Windows

PRODUCT HIGHLIGHTS:

- ☑ WINDOWS XP/ VISTA/7/8/SERVER
- ☑ DUAL BURN-IN / AGING METHODS
- ☑ CONCURRENT COMPONENT WINDOWS LOAD TESTING
- ☑ REDUCE BURN-IN SESSIONS WITH MULTI-THREADED TESTING

Looking for a Heavy Stress Load? WinStress Test Brings It.

Assuring quality, stability and reliability of newly built, serviced or upgraded PCs are primary concerns for any System Builder, PC Refurbisher and Service Technician. The WinStress Test product family offers robust stability and reliability testing at significantly reduced test session time, enhancing both efficiency and confidence in every system shipped.

WinStress Test Professional

PRODUCT HIGHLIGHTS:

- ✓ ADVANCED AND FLEXIBLE TEST CAPABILITIES
- ✓ THREE MULTI-THREADED BURN-IN / AGING METHODS
- ✓ CONFIRM FUNCTIONING & RELIABLE H/W COMPONENTS
- ✓ CUSTOMIZABLE COMMAND-LINE SCRIPTING

WinStress Test Professional Preboot

PRODUCT HIGHLIGHTS:

- ✓ NO SYSTEM INSTALL / SETUP REQUIRED
- ✓ CUSTOM SCRIPT MENU WITH SEVERAL TEST SCRIPTS
- ✓ CUSTOM INTEGRATION FOR 3RD PARTY APPLICATIONS
- ✓ AVAILABLE ON BOOTABLE USB, CDROM OR NETWORK IMAGE

MULTI-THREADED STRESS LOADING

Concurrently stress load all major components of the system to expose faulty hardware or device driver bugs that do not surface in cursory testing, such as memory management bugs, memory leaks, buffer overflows, etc. Stress testing identifies component thresholds to confirm system reliability and stability to increase confidence and overall quality of the product.

COMPLEMENTS LOW-LEVEL TESTING

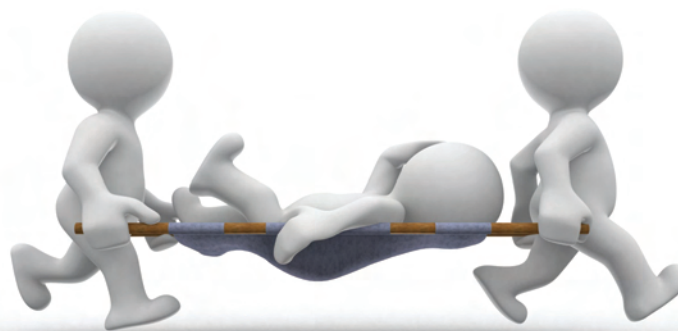

W.S.T. burn-in complements low-level testing by performing real-scenario user processes such as transferring large network data files, rendering intricate images, encoding complex multimedia, maximizing resources for VM environments and more. Whereas low-level testing looks for faulty hardware, stress testing places the hardware under abnormal levels of stress in order to ensure stability when used in a normal user environment.

"With a maximum stress level for 15 minutes I can be very confident I will not have intermittent problems when the computer reaches its final destination. You definitely understand the market you service."

The First & Only 100% OS-Free Diagnostic for Intel-based Apple Computers

A Smarter Way to Take On The World.

CUSTOM DESIGNED NATIVE PREBOOT UEFI APPS FOR OEMS

SUPPORTS THE LATEST MODELS

- MacBook
- MacBook Air
- MacBook Pro
- iMac
- Mac Pro
- Mac Mini

QuickTech IA is the first and only operating system independent software diagnostic for Intel-based Apple hardware. The self-booting CDRom auto-detects hardware in the system and then performs a ~10 minute diagnostic assessment.

Ideal for detecting high failure components such as Memory and Hard Drives.

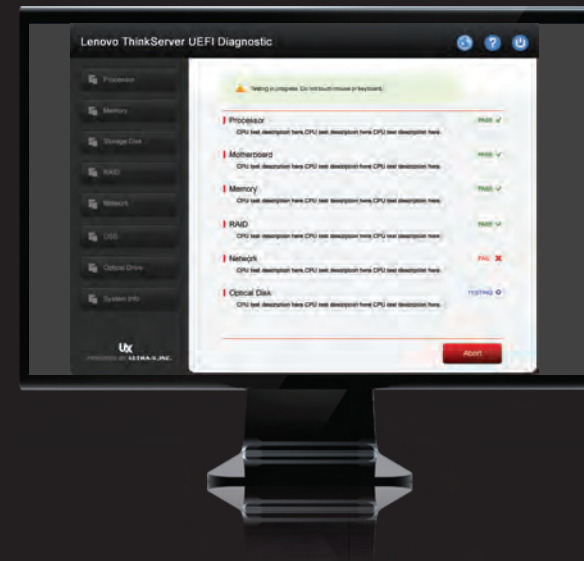

Utilizing computer assembly commands, QuickTech IA performs low-level testing in a Operating System independent environment. No DOS, Linux or Windows to interfere - providing unmatched accurate test results.

Scan

FEATURE HIGHLIGHTS

- QUICK AND SIMPLE AUTOMATED OPERATION
- SELF-BOOT & 100% OPERATING SYSTEM INDEPENDENT*
- COMPLETE AUTOMATED ASSESSMENT IN AS LITTLE AS 5 MINUTES
- SUPPORTS INETL BASED APPLE MACS (LEGACY & EFI BIOS)

Scan

UltraPOST is a hardware diagnostic utility directly embedded into the PC's UEFI BIOS ROM or bootable with compatible UEFI systems. UltraPOST executes comprehensive diagnostic tests to detect major problems with various PC components when system fails to boot. With a simple and easy-to-use GUI, UltraPOST operation is effortless and requires no boot disks.

Initiating UltraPOST is quick and easy. Simply modify your Boot Priority Options to boot UltraPOST as the first boot device in the CMOS and restart the computer. The system will automatically boot into UltraPOST and begin testing all available components or select from a start up hotkey.

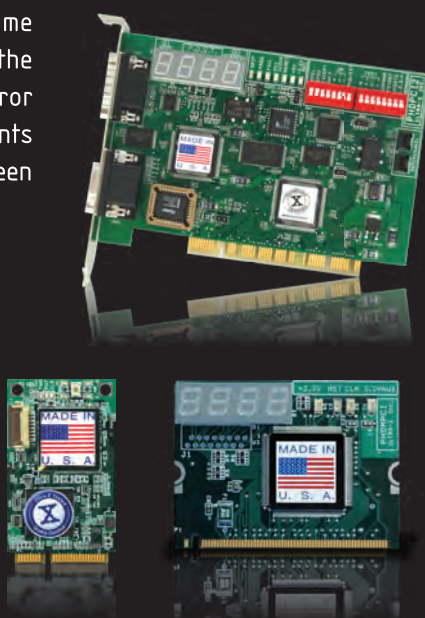

BENEFIT HIGHLIGHTS:

- IMPROVE TECHNICAL SUPPORT SUCCESS RATE
- SIGNIFICANTLY SHRINK SUPPORT & WARRANTY COSTS
- MINIMIZE UNNECESSARY PRODUCT RMA RETURNS
- INCREASE CUSTOMER CONFIDENCE IN PC HARDWARE

To Be The Best, You Need The Best. Unrivalled for over 20 Consecutive Years!

Troubleshooting systems can be a time consuming and tedious process without the proper test equipment. Trial and error methods such as swapping components doesn't guarantee that the problem has been resolved and will not reoccur.

Unlike P.O.S.T. cards that merely display POST error codes, P.H.D. Series products are actual diagnostic test cards that perform a series of dynamic diagnostics to detect faulty and unstable hardware and verify proper operation of newly upgraded system components.

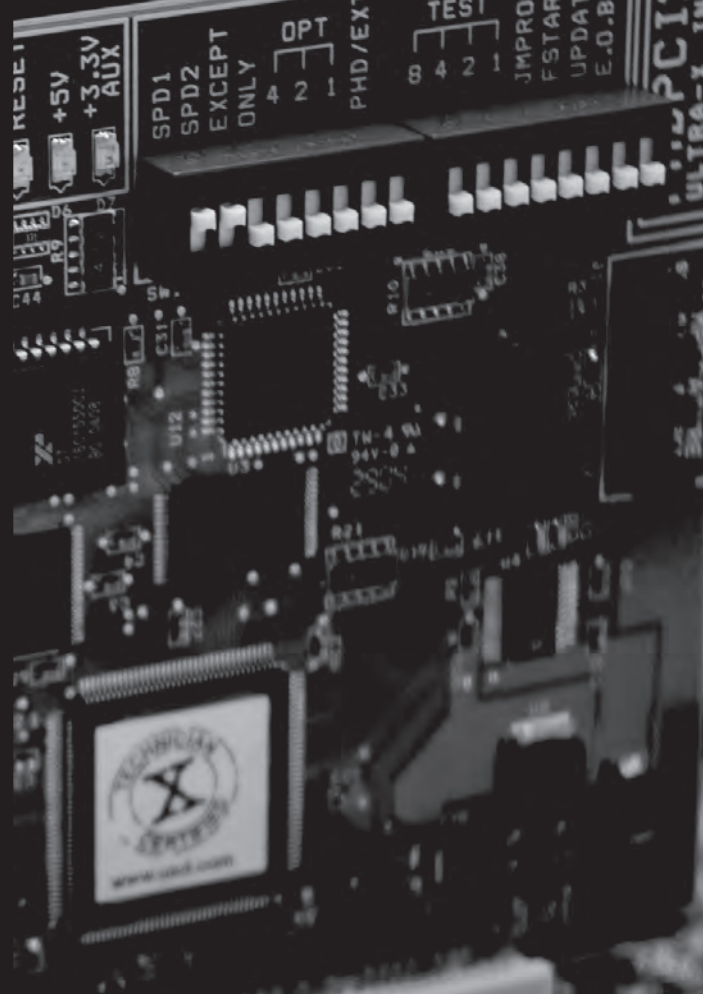

ONBOARD MEMORY
VIDEO GRAPHICS
RS-232 SERIAL PORT
TEMPERATURE SENSORS
DUAL-7 SEGMENT DISPLAYS
CRITICAL STATUS LEDs
8MB FLASH FIRMWARE ROM

Not a P.O.S.T. Card

PHD PCI2 is capable of running complete diagnostics on a PCI compliant system even if Memory, BIOS, HDD & Video Graphics hardware are dead or absent.

No More Swapping!

Performs component level motherboard testing utilizing direct hardware to hardware communication and displays simple PASS or FAIL results on the system monitor.

“P.H.D. PCI's reliability, accuracy and ease of use persuaded us to include it as a major component of our validation test procedures.”

The Power of Technological Achievement.

R.S.T. Series products are the definitive memory diagnostic and validation tools designed for the rigorous testing needs of PC memory manufacturers, system builders, design engineers, and service professionals. Powerful proprietary features and advanced functionality make R.S.T. Series products the most comprehensive memory validation tools of their kind. R.S.T. Series products are the tools of choice for numerous industry professionals who want to quickly and accurately test and validate memory in all Desktop, Server and Mobile PCs incorporating an Intel or AMD x86 compatible 32/64-bit single/multi-core processors.

R.S.T. Series products identify memory defects that may have passed every usual manufacturing test, but which can still fail in normal use. A major advantage of R.S.T. Series products compared to stand alone testers is the capabilities of testing and validating RAM within the system environment, testing for Behavioral Failures that are sensitive to system idiosyncrasies. Quickly isolate intermittent failures that do not necessarily prevent a system from booting, but surface during extended testing sessions.

Peace of Mind.

All product updates and live phone, web chat, and email support are included for the entire service term!

Finally. Anti-Malware Scanning for Commercial Use.

UAV Rescue is specifically designed for Service Professionals to provide anti-malware scanning capabilities without booting into the customer OS. When you've got a PC infected with malware, the best and sometimes only option is to boot UAV Rescue. Disinfection is more efficient outside the customer OS - eliminating any opportunities for malware to initialize, resist or relocate itself.

Search & Destroy.

UAV Rescue scans all available local storage drives locating a wide array of malware infections and providing the highest confidence remediation available.

Commercial Use.

UAV Rescue is the first anti-malware tool specifically designed for PC Service Professionals. The no nonsense annual subscription license provides unlimited use on unlimited number of PCs.

Mission Success.

Boot directly to USB or PXE Network to deploy UAV Rescue.

Download the definition updates to ensure the latest malware can be detected and destroyed.

Select all available storage drives to begin a rigorous search and destroy campaign.

Deep-cleansing tools scour and disinfect even the nastiest infections causing your system not to boot.

Traditional Methods

10x Faster

UAV Rescue

UAV Rescue increases technician efficiency by 85% over traditional anti-malware removal.

Total Security. Unparalleled PC Protection for Your Online Life.

UAV Total Security delivers unmatched PC protection from all Internet threats, and ensures the security of your social media identity and financial data while online banking, updating facebook and shopping – all without slowing down your PC. Remotely scan and fix security issues on all of your UAV-protected devices from anywhere, using the included online management dashboard.

Autopilot Enabled.

UAV Autopilot provides a hassle-free experience by making optimal security-related decisions with no input from you. This means no pop-ups, no alerts, nothing to configure.

Tune Up.

Your antivirus isn't slowing down your computer. So what is? UAV Total Security comes complete with a Tune-Up module that cleans up your file system and registry for enhanced performance

Benefits for You.

Actively protects from viruses, spam, identity theft and social media dangers.

Tune-Up function removes unnecessary files to free storage space and enhance lost PC speed and performance.

Automatic, silent updates keep your PC protected ahead of emerging threats.

Deep-cleansing tools scour and disinfect even the nastiest infections that lesser products miss

Social Network Protection filters/blocks social-networking specific e-threats by scanning links you receive from your Facebook friends, monitors your privacy settings, and much more!

Parental Control blocks inappropriate content, restricts Web access between certain hours, and helps you remotely monitor your children's online activity – even on Facebook!

The first Android Malware Scanner for Service Professionals.

The same threats that are a problem for PCs – viruses, malware and identity theft – are also threats to your Android devices. UAV Mobile Security provides Service Professionals the perfect tool to perform a complete malware scan in user files and applications. Best yet, each install license provides the End User with a full year of real-time protection ensuring your phone and private data safe from viruses and identity theft.

Malware Protection. Privacy Protection.

The on-demand scan ensures that all the applications and files installed on the device are legitimate and free from malware or other hazardous infections that are able to infect your device.

Safeguard your most personal and confidential information from risky apps and prying eyes. See how installed apps use and possibly abuse your personal information in the background without your knowledge.

Benefits for You.

On-Demand Scanning searches for malicious Apps and Files and both fixed and removable storage.

The application audit feature neatly groups legitimate apps based on their potential to perform potentially undesired actions, thus helping users to make informed security decisions.

The new Anti-theft module, with web dashboard and SMS commands, provides options to remotely locate, lock, wipe or send a message to the Android device.

Confidently surf the web as Web Security actively scans for a phishing-related page, a fraud attempt or to a page that hosts malware.

Each install license provides the Service Professional a single On-Demand scan to be used commercially and the End User with a full year of real-time protection ensuring their device and private data safe from viruses and identity theft.

No Nonsense License.

Minimize Android Device Returns & Support Costs with SUPPORTCARE!

End-users often assume that issues of any sort are a symptom of faulty defective hardware, when in fact most issues are directly related to 3rd party software apps. For System Builders, this misunderstanding can become costly and ultimately hurt the brand reputation. Ultra-X's **supportcare** Solution encourages the end user to identify potential hardware issues on their own, prior to contacting support or returning the device.

Easy as 1,2,3.

Launch **SupportCare** from the apps menu.

Select to run a diagnostic assessment or find answers to common questions via the resources function.

A customer friendly report is readily available following the diagnostic. If a hardware issue is detected, an RMA request will be automatically generated.

“ Integrating Ultra-X technology clearly emphasizes iDeaUSA’s commitment in creating innovative and quality mobile solutions for our customers. ”

Designed for End Users.

The self-check process is automated and requires minimal user interaction. Upon completion of the assessment, a few recommendations are presented for the end user to take action. If a support technician or RMA is required, an integrated support request form can quickly be submitted.

Minimize RMA & Support Costs

Preinstalled with every hardware unit shipped, the ability given to the End User to check system hardware prior to calling for support assistance helps to isolate hardware from software issues. This eliminates the time and frustration, with a noticeable reduction in overall support related inquiries and costs.

Co-branding & Private-labelling opportunities are available. Flexible options include:

- Custom Test Selection
- Multi-Language Support
- Custom Reporting
- Integration with backend support desks
